VACANCY ANNOUNCEMENT

SENIOR WATER RESOURCE CONTROL ENGINEER

**LOCATION: CENTRAL VALLEY REGIONAL WATER QUALITY CONTROL BOARD, 11020
SUN CENTER DRIVE #200, RANCHO CORDOVA, CA 95670-6114**

The Central Valley Regional Board is searching for an individual to head their Compliance and Enforcement Regulatory Unit in the Irrigated Lands Section of the Sacramento Office. This full-time permanent position presents a unique opportunity to be part of a new regulatory program for irrigated lands.

SENIOR WATER RESOURCE CONTROL ENGINEER (RPA 04-150-44)

DUTIES: Under the direction of the Supervising Water Resource Control Engineer, the Senior WRCE will direct, plan, coordinate and supervise staff and work conducted in the Compliance and Enforcement Regulatory Unit covering both the Sacramento River and the San Joaquin River Watersheds. The Senior WRCE will oversee complaint investigations, inspections, compliance evaluations and prepare formal and informal enforcement actions, as needed. Train staff in investigation and enforcement procedures. Coordinate with other units within the Irrigated Lands Section to implement a comprehensive regulatory program. Coordinate enforcement work with staff in the Fresno and Redding Regional Board offices. Present information on enforcement procedures to irrigated lands groups. Maintain a field ready staff Oversees entry of tracking information into SWIM or related databases. Prepares correspondence, work summaries, and progress reports related to all unit activities and oversees the preparation of background technical reports, correspondence and enforcement actions such as Cleanup and Abatement Orders and Administrative Civil Liability complaints.

DESIRABLE QUALIFICATIONS: Experience working with multi-disciplinary professional staff (engineers, scientists, attorneys) engaged in environmental regulation, drafting regulatory or enforcement documents (orders, staff reports,), analyzing comparative options for executive decision and the ability to effectively motivate and direct the work of others to accomplish the unit goals. An understanding of environmental water quality concerns related to discharges from irrigated lands facilities. The ability to write and speak effectively, work as a team player, make presentations before public entities, and interact with other state, federal, and local agencies and regulated communities. Should have proficient skills in computer software applications such Word, Excel, Access, and PowerPoint.

WHO MAY APPLY: Applicants must hold a current Senior Water Resource Control Engineer appointment or possess list, transfer or reinstatement eligibility for Senior Water Resource

California Environmental Protection Agency

Control Engineer. Applications will also be accepted from individuals with Senior Engineering Geologist, Senior Environmental Scientist or Senior Land and Water Use Scientist eligibility. Current reemployment, SROA and surplus provisions will be followed. Application will be screened and only the most qualified will be scheduled for interviews.

Permanent, full-time. Final Filing Date: December 24, 2004. Interested persons should submit a complete State application form and resume to William Marshall at the above address. You may call (916) 464-4670 or send an email to wmarshall@waterboards.ca.gov for further information about the position.
